RULES

- A card is placed in the middle of the table face up. Then, all the cards are distributed equally between the players, who make a pile, face down.
- At the "top", all players turn the card over on top of their pile, face up in front of them.
- The goal is to find a "multiplier/result" pair between your own card and the middle card. If you have found a pair, you put your card on the middle pile and turn over another one.
- The object of the game is to run out of cards.

TOP MULTIPLICATION
