# MY HALLOWEEN TANGRAM

Scan me !

## HISTORY

A legend says that 1000 years ago in China a man named "Tan" dropped a tile which broke into 7 pieces. While trying to put the pieces together to reconstitute the tile, the man realized that with the 7 pieces it was possible to create multiple shapes, hence the origin of the tangram game.

## RULES

The tangram is made up of seven pieces which can be juxtaposed to form a large square with an area of 16 : 5 right isosceles triangles, 1 square and 1 parallelogram.

The object of the game is to reproduce a given shape.

The rules are simple : we always use all the pieces which must be laid flat and not overlap.

it's your turn to play !

**CUT OUT THE GAME PIECES !**
