Riddle #4 : The inspector has just arrested two suspects, Clark and Cooper, who accuse each other of the crime he is investigating. But one of them always tells the truth and the other lies. The inspector asks Clark : "Are you lying or are you telling the truth ?". Clark speaks under his breath and the inspector does not understand his answer. So Cooper says : "He just said he's telling the truth !". Help the inspector find out who the liar is, so probably the murderer.

Help #1 : Determine the age of each of maggie's daughters.

Help #2 : Add the age of Maggie's eldest daughter and Maggie's age when she had her first daughter.

This is the correct answer

18

Riddle #5 : Maggie is the mother of 4 girls. She had her first daughter at 19 and gave birth every 4 years. The eldest daughter is twice as old as the youngest. How old is Maggie ?

The answer is 43
